

Subject : 2024 Euro championship and 2025 Masters championship

To the President of Fédération Internationale de la Pêche Sportive Mouche

Dear Federation,

Recent flooding of the Savinja valley has heavily affected the people of this area, in particular the fishing community and clubs located in the valley. Our thoughts are with them in these hard times.

The extent of the damage makes it impossible for the Slovenian Angling Association to organise the planned European championship in 2024. They have recently informed us about their decision, which we fully understand of course.

Hence this appeal to all European members as we are searching for alternatives and possible candidates willing to take up the challenge of organising the 2024 Euro championship.

USA originally bid to organise a triple championship in 2025, but have informed us that they will be organising just the Ladies and Youth categories. We are looking for a member to organise the Masters 2025.

Please contact FIPS-Mouche General Secretary as soon as possible if you are interested in organising one or both these championships.

Kind regards,

Stefan Allacker

General Secretary
